B.Tech student graduating in 2029, building academic and personal projects in C++, data analysis, databases and local AI. Interested in software development, data analytics and AI internships.

EDUCATION

Bachelor of Technology Expected 2029

NxtWave Institute of Advanced Technologies × Aurora Deemed to be University

Coursework: Data Structures, Advanced DBMS, Foundations of Data Science, Probability and Statistics.

TECHNICAL SKILLS

Languages Python, C++, JavaScript, HTML, CSS; Swift and SwiftUI project experience

Data and tools MongoDB, pandas, NumPy, Plotly, Jupyter, GitHub, Ollama, STL

EXPERIENCE

Artificial Intelligence Intern · Codec Technologies Pvt. Ltd. Aug–Sep 2025

Completed an internship covering model training, testing, deployment and AI application development.

PROJECTS

StatLens JavaScript · HTML · CSS | **Code**

Created a browser statistics workspace with CSV, Excel and PDF table imports, data-quality review, statistical tests, linear regression, portable sessions and HTML report exports.

ReliefLink MongoDB · Python | Group project | **Code**

Contributed the incidents module to a disaster-relief model with 6 databases, 60 collections and 3,000 synthetic records; implemented filtered queries, grouped reports and cross-collection lookups.

Emergency Service Management C++17 · STL | **Code**

Built FIFO request queues for Medical, Fire and Police services with IDs, search, duplicate checks and input validation. Preserved processing order during report sorting; includes 18 automated checks.

Online Retail Analysis Python · pandas · Plotly | **Code**

Prepared a cleaning and exploratory-analysis notebook with a browser dashboard for sales, markets, products and purchase timing; documented exclusions for missing IDs, duplicates and cancellations.

Nova SwiftUI · Apple speech APIs · Ollama | **Code**

Developed a macOS assistant prototype combining local-model chat with notes, timers, remembered facts, supported app launching and reviewed browser searches.

ParkEasy C++ | Group project

Contributed slot counting and main program flow to a parking-management application with allocation, search, billing and reports.

CERTIFICATIONS AND TRAINING

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | Aug 2025

Microsoft Learn | Data analytics learning path and 4 modules: analytics process, Power BI, Microsoft Fabric and Copilot in Power BI | Oct 2026

NIAT | Applying Text Embeddings in LLM Systems masterclass | Feb 2026

be10x | AI Tools and ChatGPT Workshop | Jun 2026 • Outskill | Generative AI Mastermind
